

Journal of Plant Ecology

Contents

Volume 10 Number 4 August 2017

RESEARCH ARTICLES

- Enriching plant diversity in grasslands by large-scale experimental sward disturbance and seed addition along gradients of land-use intensity 581
Valentin H. Klaus, Deborah Schäfer, Till Kleinebecker, Markus Fischer, Daniel Prati and Norbert Hölzel
- Community-level trait responses and intra-specific trait variability play important roles in driving community productivity in an alpine meadow on the Tibetan Plateau 592
Wei Li, Jie Zhao, Howard E. Epstein, Guanghua Jing, Jimin Cheng and Guozhen Du
- Plant growth in a fragmented forest is a consequence of top-down and bottom-up processes, but not their interaction 601
Brad J. Farmilo, John W. Morgan and Dale C. Nimmo
- Changes in microhabitat, but not allelopathy, affect plant establishment after *Acacia dealbata* invasion 610
Paula Lorenzo, Jonatan Rodríguez, Luís González and Susana Rodríguez-Echeverría
- Relationship between clade age and temperature for angiosperm tree species in forest communities along an elevational gradient in tropical Asia 618
Hong Qian
- Effects of drought and slope aspect on canopy facilitation in a mountainous rangeland 626
Mohammad Farzam and Hamid Eftehadi
- The role of the pollination niche in community assembly of *Erica* species in a biodiversity hotspot 634
Roderick W. Bouman, Sandy-Lynn Steenhuisen and Timotheüs van der Niet
- Population isolation shapes plant genetics, phenotype and germination in naturally patchy ecosystems 649
Laurent De Vriendt, Marc-André Lemay, Martine Jean, Sébastien Renaut, Stéphanie Pellerin, Simon Joly, François Belzile and Monique Poulin
- Differential water use strategies among selected rare and endangered species in West Ordos Desert of China 660
Jie Chen, Qing Xu, Deqiang Gao, Aiyun Song, Yuguang Hao and Yingbin Ma
- Effects of soil warming history on the performances of congeneric temperate and boreal herbaceous plant species and their associations with soil biota 670
Madhav P. Thakur, Peter B. Reich, Cameron Wagg, Nicholas A. Fisichelli, Marcel Ciobanu, Sarah E. Hobbie, Roy L. Rich, Artur Stefanski and Nico Eisenhauer
- Resource-sharing strategies in ecotypes of the invasive clonal plant *Carpobrotus edulis*: specialization for abundance or scarcity of resources 681
Josefina G. Campoy, Rubén Retuerto and Sergio R. Roiloa
- Plant responses to arbuscular mycorrhizae under elevated temperature and drought 692
Phyllis H. Pischl and Nicholas A. Barber
- Sexual dimorphism in water and nitrogen use strategies in *Honckenya peploides*: timing matters 702
Julia Sánchez Vilas and Rubén Retuerto
- Linking the hierarchical decision-making process of fruit choice and the phenotypic selection strength on fruit traits by birds 713
Facundo X. Palacio, Juan Manuel Girini and Mariano Ordano
- Do introduced honeybees affect seed set and seed quality in a plant adapted for bird pollination? 721
Amy-Marie Gilpin, Justin C. Collette, Andrew J. Denham, Mark K. J. Ooi and David J. Ayre

On the cover: An endemic bird from the southern Yungas, the Yellow striped Brush finch (*Atlapetes citrinellus*) eating a fruit of the understory treelet *Psychotria carthagenensis*. Photo taken by Facundo X. Palacio.
