1 Introduction	1
<i>J.G. Isebrands and J. Richardson</i>	
2 Poplars and Willows of the World, With Emphasis on Silviculturally Important Species	8
<i>Donald I. Dickmann and Julia Kuzovkina</i>	
2.1 Introduction	8
2.1.1 Systematics	12
2.1.2 Nomenclature	13
2.2 The Genus <i>Populus</i>	27
2.2.1 Characteristics of poplars	27
2.2.2 Descriptions of <i>Populus</i> species	39
2.3 The Genus <i>Salix</i>	56
2.3.1 Characteristics of willows	56
2.3.2 Descriptions of <i>Salix</i> species	65
Acknowledgements	83
Notes	83
References	83
3 Ecology and Physiology of Poplars and Willows	92
<i>J. Richardson, J.G. Isebrands and J.B. Ball</i>	
3.1 Introduction	92
3.2 <i>Populus euphratica</i> Olivier, Euphrates Poplar	93
3.3 <i>Populus deltoides</i> Marshall, Eastern Cottonwood	93
3.4 <i>Populus nigra</i> Linnaeus, Black Poplar	95
3.5 <i>Populus balsamifera</i> Linnaeus, Balsam Poplar	96
3.6 <i>Populus maximowiczii</i> Henry, Japanese Poplar, and <i>Populus suaveolens</i> Fischer, Siberian Poplar	98
3.7 <i>Populus trichocarpa</i> Torrey and Gray, Black Cottonwood	99

3.8	<i>Populus alba</i> Linnaeus, White Poplar	100
3.9	<i>Populus tremula</i> Linnaeus, Common Aspen	101
3.10	<i>Populus tremuloides</i> Michaux, Quaking or Trembling Aspen	102
3.11	Other Chinese Poplars	104
3.12	<i>Salix humboldtiana</i> Willd., Humboldt's Willow	105
3.13	<i>Salix nigra</i> Marshall, Black Willow	105
3.14	<i>Salix alba</i> Linnaeus, White Willow	106
3.15	<i>Salix interior</i> Rowlee, Sandbar Willow or Narrow-leaved Willow, and <i>Salix exigua</i> Nutt., Coyote Willow	107
3.16	<i>Salix eriocephala</i> Michaux, Heart-leaved Willow	109
3.17	<i>Salix viminalis</i> Linnaeus, Common Osier or Basket Willow	110
3.18	Physiology of Poplars and Willows	111

6 Environmental Applications of Poplars and Willows	258
<i>J.G. Isebrands, P. Aronsson, M. Carlson, R. Ceulemans, M. Coleman, N. Dickinson, J. Dimitriou, S. Doty, E. Gardiner, K. Heinsoo, J.D. Johnson, Y.B. Koo, J. Kort, J. Kuzovkina, L. Licht, A.R. McCracken, I. McIvor, P. Mertens, K. Perttu, D. Riddell-Black, B. Robinson, G. Scarascia-Mugnozza, W.R. Schroeder, J. Stanturf, T.A. Volk and M. Weih</i>	
6.1 Introduction	258
6.2 Windbreaks and Shelterbelts	259
6.2.1 Introduction	259
6.2.2 Worldwide overview	259
6.2.3 Shrub willow living snow fences	262
6.3 Soil Erosion Control and Riparian Buffers	266
6.3.1 Use of poplar and willow to create forested riparian buffers in the Lower Mississippi Alluvial Valley	266
6.3.2 Streamside restoration and stabilization with riparian buffers in the Pacific Northwest, USA	270
6.3.3 Erosion control in New Zealand	271
6.3.4 Riverbank stabilization in New Zealand	272
6.4 Land Restoration	274
6.5 Phytoremediation	274
6.5.1 Introduction	274
6.5.2 Belgium	277
6.5.3 Canada	280
6.5.4 Estonia	283
6.5.5 Italy	285
6.5.6 Korea	287
6.5.7 New Zealand and Australia	289
6.5.8 Sweden	294
6.5.9 UK	297
6.6 Ecosystem Services	318
6.6.1 Biodiversity, environment and landscape	318
6.6.2 Carbon sequestration	318
6.6.3 Poplar growing in the environment of the Walloon region, Belgium	319
6.6.4 Other emerging ecosystem services opportunities	320

9.3.2	Birds	471
9.4	Integrated Pest Management (IPM) of Insect Pests of Poplars and Willows	471
9.4.1	What is IPM?	471
9.4.2	Cultural control of insect pests	474
9.4.3	Biological control of insect pests	477
9.4.4	Chemical control of insect pests	479
9.4.5	Genetic engineering	480
9.5	Invasive Species and International Exchanges of Plant Material	481
9.5.1	Immigration along man-made pathways	481
9.5.2	Seeds	482
9.5.3	Cuttings and seedlings	482
9.5.4	Bark or cut timber	482
9.5.5	Response to invasion	482
9.6	Conclusions	483

9.7	Selected Examples of Insect Pests of Poplars and Willows	483
9.7.1	Willow sawfly, <i>Nematus oligospilus</i> (Hymenoptera: Tenthredinidae)	483
9.7.2	Poplar and willow leaf beetles, <i>Chrysomela</i> spp. (Coleoptera: Chrysomelidae)	485
9.7.3	Large aspen tortrix, <i>Choristoneura conflictana</i> (Lepidoptera: Tortricidae)	487
9.7.4	Poplar leaf defoliators, <i>Clostera</i> spp. (Lepidoptera: Notodontidae)	488
9.7.5	Poplar leaf miner, <i>Phyllocnistis unipunctella</i> (Lepidoptera: Phyllocnistidae)	490
9.7.6	Woolly poplar aphid, <i>Phloeomyzus passerinii</i> (Hemiptera: Aphididae)	491
9.7.7	Giant willow aphid, <i>Tuberolachnus salignus</i> (Hemiptera: Aphididae)	494
9.7.8	Willow gall midges, <i>Dasineura</i> spp. (Diptera: Cecidomyiidae)	495
9.7.9	Dusky clearwing, <i>Paranthrene tabaniformis</i> (Lepidoptera: Sesiidae)	496
9.7.10	Poplar twig borers, <i>Gypsonoma</i> spp. (Lepidoptera: Tortricidae)	498
9.7.11	Poplar borers, <i>Saperda</i> spp. (Coleoptera: Cerambycidae)	499
9.7.12	Asian longhorn beetle, <i>Anoplophora glabripennis</i> (Coleoptera: Cerambycidae)	501
9.7.13	Ambrosia beetle, <i>Megaplatypus mutatus</i> (Coleoptera: Platypodidae)	503
9.7.14	Poplar and willow borer, <i>Cryptorhynchus lapathi</i> (Coleoptera: Curculionidae)	505
9.7.15	Poplar hornet clearwing, <i>Sesia</i> (= <i>Aegeria</i>) <i>apiformis</i> (Lepidoptera: Sesiidae)	507
9.7.16	Tremex wasp, <i>Tremex fuscicornis</i> (Hymenoptera: Siricidae)	509

11 Markets, Trends and Outlook	562
<i>Qiang Ma and Arvydas Lebedys</i>	
11.1 Introduction	562
11.2 Overall Global Market Trends for Wood Products	562
11.2.1 Transformation of market structures – towards emerging economies	562
11.2.2 Global trends in production of wood products	563
11.3 Poplar and Willow Resources and Products: Production and Trade	563
11.3.1 Poplar and willow resources for wood production	563
11.3.2 Production and trade of poplar and willow products	565
11.4 Evolution of the Poplar Products Market in China, Europe and North America	565
11.4.1 China has become the main engine in the production and trade of wood and poplar wood products in the world	565
11.4.2 Evolution of the European poplar-based industrial market	568
11.4.3 The importance of poplar for wood pulp and paper and the marketing challenges of poplar products in North America	569
11.5 Economic Importance (Comparative Advantages) of Poplar and Willow Plantations	571
11.5.1 Financial advantages of poplar plantations in China	571
11.5.2 Cost-efficiency of willows for energy in Sweden	572
11.5.3 Potential economic benefits of expanded basket willow cultivation in Chile	572
11.6 Policies, Outlook and Development Potential	572
11.6.1 Poplar and willow development and biodiversity conservation	572
11.6.2 Changes in market patterns for poplar and willow products	573
11.6.3 Potential contribution to climate change policies such as bioenergy policy	573
11.7 Conclusions	575
